Methodology: Percent at Levels 3 & 4 compares the aggregate of all students tested in the charter school to the aggregate of students in the same tested grades in the local district.

¹ CDCH is unique in its combination of small enrollment, multiple districts of residence, and large special education population. The data are too limited to draw meaningful conclusions.

² This school opened in September of 2006 and the ELA exam was given just over four months later in January of 2007. Thus the test results reported are more reflective of students' abilities upon entering the school rather than the performance of the school itself and should be used for baseline purposes only.
