Methodology: Percent at Levels 3 & 4 compares the aggregate of all students tested in the charter school to the aggregate of students in the same tested grades in the local district.

¹ Relative 2006-07 results: This school opened in September of 2006 and the English Language Arts exam was given just over five months later in February of 2007. Thus the test results reported for 2006-2007 are more reflective of students' abilities upon entering the school rather than the performance of the school itself and should be used for baseline purposes only.

² Relative 2006-07 results: This school also opened in September of 2006 and the English Language Arts exam was given just over five months later in February of 2007. Thus the test results reported for 2006-2007 are more reflective of students' abilities upon entering the school rather than the performance of the school itself and should be used for baseline purposes only.

³ This school opened in September of 2007 and the Math exam was given just over six months later in March of 2008. Thus the test results reported are more reflective of students' abilities upon entering the school rather than the performance of the school itself and should be used for baseline purposes only.

⁴ CDCH is unique in its combination of small enrollment, multiple districts of residence, and large special education population. The data are too limited to draw meaningful conclusions.
