Methodology: Percent at Levels 3 & 4 compares the aggregate of all students tested in the charter school to the aggregate of students in the same tested grades in the local district.

¹ This school opened in September of 2008 and the Math exam was given just over six months later in March of 2009. Thus the test results reported are more reflective of students' abilities upon entering the school rather than the performance of the school itself and should be used for baseline purposes only.

² CDCH is unique in its combination of small enrollment, multiple districts of residence, and large special education population. The data are too limited to draw meaningful conclusions.
