

## Preliminary Enrollment Targets

The Charter Schools Institute (Institute) has been working with the New York State Education Department (NYSED) to develop enrollment and retention targets as required by amendments to the New York Charter Schools Act of 1998 (Act) effective May 2010. Our work is still preliminary and will be shared with the charter school community for input prior to the adoption of any final practices.

### Statutory Framework

Amendments to the New York Charter Schools Act of 1998 (Act) effective May 2010 require that enrollment and retention targets prescribed by the SUNY Trustees for students with disabilities (SDIS), English language learners (ELL), and students who are eligible applicants for the federal Free and Reduced-Price Lunch Program (FRPL) be considered: 1) as part of the new application process for schools chartered under the new Request for Proposal (RFP) process; and 2) as part of the renewal application process for all schools.

With respect to new applications, the SUNY Trustees “shall not consider any [RFP] applications which do not rigorously demonstrate that they . . . would meet or exceed enrollment and retention targets, as prescribed by” the SUNY Trustees.<sup>1</sup>

When developing the targets, the SUNY Trustees must ensure the enrollment targets are comparable to the enrollment figures and rate of retention of the selected populations attending public schools within the school district in which the charter school is located. Therefore, targets will vary from school to school based on the school’s school district of location, or, in the case of New York City, the community school district (CSD).

Similarly, a charter school’s renewal application must include the “means by which the charter school will meet or exceed enrollment and retention targets” prescribed by the SUNY Trustees.<sup>2</sup> At the time of renewal, the SUNY Trustees, in accordance with the statute, would take into account the extent to which the charter school has demonstrated good faith efforts to enroll and retain a comparable proportion of SDIS, ELL and FRPL students when compared to the enrollment figures for such students in the school district in which the charter school is located.

In addition to the ability to set targets, the SUNY Trustees retain significant discretion in applying the targets to charter schools. According to the amendments to the Act, the SUNY Trustees or the Board of Regents “may terminate a charter” for “repeated failure to comply with the requirement to meet or exceed the enrollment and retention targets, provided that it has not demonstrated that it has made extensive efforts to recruit and retain such students, including outreach to parents and families in the surrounding communities, widely publicizing the lottery for such school, and efforts to academically support such students in such charter school.”<sup>3</sup>

<sup>2</sup> Education Law §2851(4)(e).

<sup>3</sup> Education Law §2855(1)(e).

### Framework for Developing Enrollment Targets

Institute staff and NYSED representatives have agreed to develop a common model for determining schools' enrollment and retention targets. The two authorizers have discussed the specific challenges of setting fair and meaningful targets considering the specific factors that contribute to the distribution of the three sub-populations within a school district. These dimensions include the local school districts' formal process for identifying students in these need demographic categories, the districts' provision of services for students from these sub-populations, as well as residential settlement patterns.

District-level FRPL, SDIS, and ELL percents will be established as enrollment targets for all eligible charter schools in the respective districts. These targets will be in effect for all applicants submitting proposals in the 2012 calendar year through the school's first charter period if chartered. The targets will also be in effect for charter schools opening in 2012 through the end of their first charter period, as well as for all charter schools submitting a charter renewal application during calendar year 2011 for use through the end of their renewal charter period. Given limited change in overall district sub-population size, the same set of targets would be in effect for a number of years before the analysis would be conducted again. Each charter school would track its progress toward the enrollment targets and report to its authorizer annually using its own data. In addition to reporting their actual enrollment and retention results, the charter schools would be able to monitor their progress toward the targets and evaluate the effectiveness of their enrollment and retention efforts.

In developing a framework for setting the targets the following factors have been considered. The most representative and precise estimates for targets require an approach that takes into account the grade configurations of each charter school, the typical flow of students into and out of the schools in the charters' home districts, and the time sequence for classifying students' demographic needs. Statistical estimates for the influence of these factors must be calculated at the individual school level at each grade level for all schools in each district and then averaged across schools, in order to yield the respective district-level parameters.

The model would use district-level grade parameters aligned with each charter school's grade configuration. For instance, for a charter with a grade span of K – 3, the percent of all public school kindergarten students in the district who are classified as disabled would be used as the enrollment target for grade K; the percent of all grade 1 public school students who are classified as disabled will be used as the enrollment target for grade 1; and so on. Many new charter schools phase in grades annually during their start-up years, a factor that must be taken into consideration in establishing targets for charter school enrollment and retention. For new charters with planned phase-in grades, the targets would be based on the proposed grade span at the end of the charter period. For example, a charter school that opens with grades K and 1 and grows to K-5 in the last year of the charter period would have targets based on grades K-5.

The model would establish enrollment targets by assessing the status of demographic needs groups in public schools within charter districts at the beginning of the school year and sets retention targets based on the analysis of discharged students in the same schools. Targets would be set for retention of demographic needs students through the analysis of students in these categories who are discharged during the school year for each grade and high school cohort.

A status accounting approach to be developed by the authorizers would be used to establish a single set of grade-level enrollment targets that will be used by charter schools to track and report their

progress for the five years of their charters. In order to generate enrollment targets that can be disseminated to applicants submitting proposals for new charters in January 2012 and to currently operating charter schools in spring 2012, data from the NYSED student database for the 2009-10 and 2010-11 school year would be used in target estimation.

Sources: Total Enrollment, ELL, and Lunch Data came from the State Education Department. Special Education data for districts outside of NYC came from State Education Department. New York City special education data calculated using enrollment and special education classification data from the NYC DOE's Demographics and Accountability Snapshot.

All data is for the 2008-09 school year.
