

**Success Academy Charter School –
Harlem 5**

**2013-14 ACCOUNTABILITY PLAN
PROGRESS REPORT**

Submitted to the SUNY Charter Schools Institute on:

September 15, 2014

By Brett Wagoner

301 West 140th St., Floor 3
New York, NY 10030
(646) 380-2580

Brett Wagoner, Data Reporting Associate, prepared this 2013-14 Accountability Progress Report on behalf of the school's board of trustees:

Trustee's Name	Board Position
Sam Cole	Chair
Bryan Binder	Vice Chair
Scott Friedman	Treasurer
Greg Sawers	Secretary
Cate Shinker	
Jay Bryant	
Sam Chainani	
Donna Kennedy	
Lance Rosen	
Derrell Bradford	
Khadijah Patrick-Pickel	<i>Ex-officio</i> Parent Representative

Khari Shabazz (K-3) and Lauren Jonas (4-5) served as the school leaders in 2013-14.

INTRODUCTION

The mission of Success Academy Charter School – Harlem 5 (“SA Harlem 5”) is to provide students in New York City with an exceptionally high-quality education that gives them the knowledge, skills, character, and disposition to meet and exceed New York State Common Core Learning Standards and the resources to lead and succeed in school, college, and a competitive global economy.

School Enrollment by Grade Level and School Year¹

School Year	K	1	2	3	4	5	6	7	8	9	10	11	12	Total
2010-11	84	104												188
2011-12	57	85	107											249
2012-13	79	77	91	86										333
2013-14	86	87	86	97	78									434

¹ Enrollment numbers are current as of March 31, 2014. Per instruction from SUNY, enrollment numbers reflect originating charters.

ENGLISH LANGUAGE ARTS

Goal 1: English Language Arts

Students will demonstrate proficiency in reading, writing, and comprehending the English language

Background

Believing that all students can succeed, SA Harlem 5 goes above and beyond Common Core standards. SA Harlem 5 uses THINK Literacy, a comprehensive balanced literacy program, in all grades. THINK Literacy was developed in-house by the Instructional Management team at Success Academy Charter Schools, the charter management organization. There are many components of THINK, including Shared Text, Guided Reading, Read Aloud with Discussion, Reading Workshop, and Writing Workshop. During Shared Text, the teacher displays a text and the whole class reads and analyzes it together, giving students practice interpreting brief, engaging texts. During Guided Reading, the teacher works with a small group of students to read and comprehend a book that is one level above what they can read and understand independently. During Read Aloud with Discussion, the teacher models the internal thinking that excellent readers exhibit, and students discuss their ideas about the book with their classmates. During Reading Workshop and Writing Workshop, students internalize key aspects of great reading and writing, through direct instruction, independent work, and partner work. All THINK components press students to read, write, think, and speak with clarity and precision.

In kindergarten and first grade, students also receive extensive phonics instruction. This early literacy curriculum is modeled on an enhanced version of Success For All (SFA), which has a proven track record in urban schools and has been implemented in 1,300 schools around the United States.

Students are assessed in reading regularly. They progress to the next instructional reading level when ready. Thus, children are assigned to appropriate reading levels based on reading performance, not age or grade.

SA Harlem 5 enforces specific protocols for how it collects, distributes, and analyzes data. These protocols work to help teachers and school leaders freely access information in real-time. In a fast-paced and constantly changing school environment, having ready access to academic data empowers the staff to better decide how to expend time and resources so as to maximize student achievement.

SA Harlem 5 views its teachers as Olympic athletes who must constantly train and improve their skills. Professional development is a regular part of their professional responsibilities as it develops skills, provides content area knowledge, and improves pedagogical techniques so that the teachers are prepared to “win the race” that is educating children. Further information is available in the school’s charter.

Goal 1: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at proficiency on the New York State English language arts examination for grades 3-8.

This measure assumes that the general format and structure of the State ELA exam will remain consistent. To the extent that there are significant format and structure changes to the exam, the school understands that its authorizer will take such changes into account when assessing the school's performance.

Method

The school administered the New York State Testing Program English language arts assessment to students in third through fourth grade in April 2014. Each student's raw score has been converted to a grade-specific scaled score and a performance level.

The table below summarizes participation information for this year's test administration. The table indicates total enrollment and total number of students tested. It also provides a detailed breakdown of those students excluded from the exam. Note that this table includes all students according to grade level, even if they have not enrolled in at least their second year.

**2013-14 State English Language Arts Exam
Number of Students Tested and Not Tested**

Grade	Total Tested	Not Tested ²			Total Enrolled
		IEP	ELL	Absent	
3	97	0	0	0	97
4	78	0	0	0	78
5					
6					
7					
8					
All	175	0	0	0	175

Results

Based on third and fourth grade scores from 2013-14, SA Harlem 5 did not meet the 75 percent proficient rate goal for English language arts. However, as noted below, this is due to significant changes to the exam.

**Performance on 2013-14 State English Language Arts Exam
By All Students and Students Enrolled in At Least Their Second Year**

Grades	All Students		Enrolled in at least their Second Year	
	Percent	Number Tested	Percent	Number Tested

² Students exempted from this exam according to their Individualized Education Program (IEP), because of English Language Learners (ELL) status, or absence for at least some part of the exam.

3	61.86%	97	61.86%	97
4	69.23%	78	69.23%	78
5				
6				
7				
8				
All	65.14%	175	65.14%	175

Evaluation

Schools across New York State experienced significantly lower scores on state exams in 2012-13 and 2013-14 due to the shift to assessments that measure the Common Core Learning Standards. These lower scores were anticipated by the New York State Department of Education as the new examination was expected to “effectively create a new baseline measurement of student learning.”³

Despite the lower pass rates, SA Harlem 5 ranks in the top 3% of elementary schools statewide (by overall proficiency rate) and has outperformed other schools in its district in the 2013-14 school year by a wide margin.

Additional Evidence

As noted above, the New York State English language arts examination increased in difficulty in 2012-13 and 2013-14. SA Harlem 5 ranks in the top 3% of elementary schools statewide.

English Language Arts Performance by Grade Level and School Year

Grade	Percent of Students Enrolled in At Least Their Second Year Achieving Proficiency

³ See, e.g., *Memo from Commissioner King: Use of State Test Scores in Teacher and Principal Evaluations*, dated Aug. 2, 2013, available at <http://usny.nysed.gov/docs/memo-scores-release.pdf> (last visited Sept. 4, 2013).

Goal 1: Absolute Measure

Each year, the school’s aggregate Performance Level Index (PLI) on the State English language arts exam will meet the Annual Measurable Objective (AMO) set forth in the state’s NCLB accountability system.

Method

The federal No Child Left Behind law holds schools accountable for making annual yearly progress towards enabling all students to be proficient. As a result, the state sets an AMO each year to determine if schools are making satisfactory progress toward the goal of proficiency in the state’s learning standards in English language arts. To achieve this measure, all tested students must have a Performance Level Index (PLI) value that equals or exceeds the 2013-14 English language arts AMO of 89. The PLI is calculated by adding the sum of the percent of all tested students at Levels 2 through 4 with the sum of the percent of all tested students at Levels 3 and 4. Thus, the highest possible PLI is 200.⁴

Results

For 2013-14, SA Harlem 5 achieved a PLI of 159. This is substantially greater than the target AMO of 89 (by 75 points).

English Language Arts 2013-14 Performance Level Index (PLI)

Number in Cohort	Percent of Students at Each Performance Level			
	Level 1	Level 2	Level 3	Level 4
175	6	29	51	14

$$\begin{array}{rcccccccc}
 \text{PI} & = & 29 & + & 51 & + & 14 & = & 94 \\
 & & & & 51 & + & 14 & = & \underline{65} \\
 & & & & & & \text{PLI} & = & 159
 \end{array}$$

Evaluation

SA Harlem 5 met this goal by achieving a PLI of 159. This is significantly greater than the AMO of 89.

Goal 1: Comparative Measure

Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state English language arts exam will be greater than that of all students in the same tested grades in the local school district.

Method

A school compares tested students enrolled in at least their second year to all tested students in the surrounding public school district. Comparisons are between the results for each grade in which

⁴ In contrast to SED’s Performance Index, the PLI does not account for year-to-year growth toward proficiency.

the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.⁵

Results

SA Harlem 5 achieved an overall proficiency rate of 65.14% (for students enrolled in at least their second year), approximately 50 percentage points higher than District 3’s proficiency rate of 15%.

**2013-14 State English Language Arts Exam
SA Harlem 5 and District Performance by Grade Level**

Grade	Percent of Students at Proficiency			
	SA Harlem 5 Students In At Least 2 nd Year		All District Students	
	Percent	Number Tested	Percent	Number Tested
3	61.86%	97	14%	932
4	69.23%	78	16%	899
5				
6				
7				
8				
All	65.14%	175	15%	1831

Evaluation

SA Harlem 5 met this goal with a proficiency rate that exceeded the local district’s proficiency rate of 15% by approximately 50 percentage points. SA Harlem 5 outperformed the local district in all grade levels.

Additional Evidence

SA Harlem 5 significantly outperformed its local district in the 2012-13 and 2013-14 school years.

**English Language Arts Performance of SA Harlem 5 and Local District
by Grade Level and School Year**

Grade	Percent of Students Enrolled in at Least their Second Year Who Are at Proficiency Compared to Local District Students

4					69.23%	16%
5						

⁵ Schools can acquire this data when the New York State Education Department releases its Access database containing grade level ELA and math test results for all schools and districts statewide. The NYSED announces the release of the data on its [News Release webpage](#).

6						
7						
8						
All			60.0%	13.4%	65.14%	15%

Goal 1: Comparative Measure

Each year, the school will exceed its predicted level of performance on the state English language arts exam by an Effect Size of 0.3 or above (performing higher than expected to a small degree) according to a regression analysis controlling for students eligible for economically disadvantaged students among all public schools in New York State.⁶

Method

The Charter Schools Institute conducts a Comparative Performance Analysis, which compares the school’s performance to demographically similar public schools state-wide. The Institute uses a regression analysis to control for the percentage of economically disadvantaged students among all public schools in New York State. The Institute compares the school’s actual performance to the predicted performance of public schools with a similar economically disadvantaged percentage. The difference between the schools’ actual and predicted performance, relative to other schools with similar economically disadvantaged statistics, produces an Effect Size. An Effect Size of 0.3 or performing higher than expected to a small degree is the requirement for achieving this measure.

Given the timing of the state’s release of economically disadvantaged data and the demands of the data analysis, the 2013-14 analysis is not yet available. This report contains 2012-13 results, the most recent Comparative Performance Analysis available.

Results

According to the Comparative Performance Report, SA Harlem 5 had a “higher than expected to a large degree” effect on student achievement; the school demonstrated an effect size of 3.13.

2012-13 English Language Arts Comparative Performance by Grade Level

Grade	Percent of Economically Disadvantaged Students	Number of Students Tested	Percent of Students at Proficiency		Difference between Actual and Predicted	Effect Size
			Actual	Predicted		
3	80.0	80	63.8	21.8	42.0	3.13
4						
5						
6						
7						

⁶ The Institute will continue using *economically disadvantaged* instead of *eligibility for free lunch* as the demographic variable in 2013-14. Schools should report previous year’s results using reported free-lunch statistics.

8						
All	80.0	80	63.8	21.8	42.0	3.13

School's Overall Comparative Performance:						
Higher than expected to a large degree						

Evaluation

SA Harlem 5 met this goal with an effect size of 3.13. This far exceeds the target value of 0.3, and was determined to be “higher than expected to a large degree.”

Additional Evidence

The 2012-13 academic year was the first for which SA Harlem 5 has comparative performance data. The school believes that it will demonstrate consistently high effect sizes in the years to come.

English Language Arts Comparative Performance by School Year

School Year	Grades	Percent Eligible for Free Lunch	Number Tested	Actual	Predicted	Effect Size
2010-11						
2011-12						
2012-13	3	80	80	63.8	21.8	3.13

Goal 1: Growth Measure⁷

Each year, under the state’s Growth Model, the school’s mean unadjusted growth percentile in English language arts for all tested students in grades 4-8 will be above the state’s unadjusted median growth percentile.

Method

This measure examines the change in performance of the same group of students from one year to the next and the progress they are making in comparison to other students with the same score in the previous year. The analysis only includes students who took the state exam in 2012-13 and also have a state exam score from 2011-12 including students who were retained in the same grade. Students with the same 2011-12 score are ranked by their 2012-13 score and assigned a percentile based on their relative growth in performance (student growth percentile). Students’ growth percentiles are aggregated school-wide to yield a school’s mean growth percentile. In order for a school to perform above the statewide median, it must have a mean growth percentile greater than 50.

Given the timing of the state’s release of Growth Model data, the 2013-14 analysis is not yet available. This report contains 2012-13 results, the most recent Growth Model data available.⁸

⁷ See Guidelines for [Creating a SUNY Accountability Plan](#) for an explanation.

⁸ Schools can acquire this data from the NYSED’s Business Portal: portal.nysed.gov.

Results

SA Harlem 5 did not serve testing grades in 2011-12. As such, no 2012-13 Mean Growth percentile is available.

Summary of the English Language Arts Goal

Type	Measure	Outcome
Absolute	Each year, 75 percent of all tested students who are enrolled in at least their second year will perform at proficiency on the New York State English language arts exam for grades 3-8. This measure assumes that the general format and structure of the State ELA exam will remain consistent. To the extent that there are significant format and structure changes to the exam, the school understands that its authorizer will take such changes into account when assessing the school's performance.	Did Not Achieve
Absolute	Each year, the school's aggregate Performance Level Index (PLI) on the state English language arts exam will meet that year's Annual Measurable Objective (AMO) set forth in the state's NCLB accountability system.	Achieved
Comparative	Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state English language arts exam will be greater than that of students in the same tested grades in the local school district.	Achieved
Comparative	Each year, the school will exceed its predicted level of performance on the state English language arts exam by an Effect Size of 0.3 or above (performing higher than expected to a small degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State. (Using 2012-13 school district results.)	Achieved
Growth	Each year, under the state's Growth Model the school's mean unadjusted growth percentile in English language arts for all tested students in grades 4-8 will be above the state's unadjusted median growth percentile.	N/A

Action Plan

In order to continue improving in English language arts, SA Harlem 5 will make the following improvements to its literacy program:

- More effectively use shared text to enhance student discussions around literature that are truly student-driven and less directed by the teacher.
- Provide students with more opportunities to respond to literature in writing.
- Promote genre variety in the classroom by giving students short excerpts of non-fiction, realistic fiction, folktales, interviews, plays, pamphlets, advertisements, etc.
- Help students identify the main idea of what they read in order to better understand author's purpose and connect details to a cohesive narrative.
- Deepen class discussions around literature to transcend the literal and have students infer character traits, feelings and other aspects of literature not explicitly written.

MATHEMATICS

Goal 2: Mathematics

Students will show competency in their understanding and application of mathematical computation and problem solving.

Background

SA Harlem 5 uses Cognitively Guided Instruction (CGI) and the Investigations math program. Some of its key elements are described below:

- **Problem Solving** – CGI offers students a chance to solve real world, contextualized mathematical problems using conceptual understanding. Students learn the basics of problem solving strategies by solving daily word problems that require critical thinking and both written and verbal expression of mathematical reasoning. Students work individually to solve a problem and then share their strategies with their peers. The teacher leads a discussion based on student strategies that leads to understanding of mathematical properties.
- **Assessment** – SA Harlem 5 administers Math Interim Assessments and weekly quizzes to determine the progress of students with respect to the Common Core standards. Teachers use the data to inform future instruction.
- **Common Core State Standard Alignment** – SA Harlem 5 has mapped the scope and sequence of CGI and the Investigations math program to closely align with the Common Core. This scope and sequence closely follows the state and national requirements of what students should know and be able to do at each administration of the state math assessments. By aligning closely with the Common Core and assessments, teachers will have a much better sense of where their students stand in SA Harlem 5's goal of preparing all students for college-track level mathematics in middle and high school.
- **Conceptual Understanding** – Investigations math places an emphasis on open-ended exploration and interactive learning components to each lesson to let students make sense of mathematics by building on ideas and observations from previous experiences. By learning mathematical ideas and procedures that is grounded in meaning, students are able to apply their thinking to new situations and unfamiliar problems. CGI uses daily world problems to give students meaning, understanding, and application to the math they learn.
- **Computational Fluency** – SA Harlem 5 also provides students with regular math facts practice because it recognizes the importance of computational fluency. Math facts quizzes emphasize both accuracy and speed.

Goal 2: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at proficiency on the New York State mathematics examination for grades 3-8.

This measure assumes that the general format and structure of the State mathematics exam will remain consistent. To the extent that there are significant format and structure changes to the exam, the school understands that its authorizer will take such changes into account when assessing the school's performance.

Method

The school administered the New York State Testing Program mathematics assessment to students in third through fourth grade in April 2014. Each student's raw score has been converted to a grade-specific scaled score and a performance level.

The table below summarizes participation information for this year's test administration. The table indicates total enrollment and total number of students tested. It also provides a detailed breakdown of those students excluded from the exam. Note that this table includes all students according to grade level, even if they have not enrolled in at least their second year.

**2013-14 State Mathematics Exam

5				
6				
7				
8				
All	93.71%	175	93.71%	175

Evaluation

SA Harlem 5 met the absolute measure goal in 2013-14 for mathematics. All grades achieved high proficiency rates.

Additional Evidence

SA Harlem 5 exceeded this absolute measure goal for math by a wide margin with an overall proficiency rate of 95.63% (for students enrolled in at least their second year). As it continues to improve its math program, SA Harlem 5 expects to continue to perform well in the future.

Mathematics Performance by Grade Level and School Year

Grade	Percent of Students Enrolled in At Least Their Second Year Achieving Proficiency					
	2011-12		2012-13		2013-14	
	Percent	Number Tested	Percent	Number Tested	Percent	Number Tested

4					91.03%	78
5						
6						
7						
8						
All			83.5%	85	93.71%	175

Goal 2: Absolute Measure

Each year, the school’s aggregate Performance Level Index (PLI) on the State mathematics exam will meet the Annual Measurable Objective (AMO) set forth in the state’s NCLB accountability system.

Method

The federal No Child Left Behind law holds schools accountable for making annual yearly progress towards enabling all students to be proficient. As a result, the state sets an AMO each year to determine if schools are making satisfactory progress toward the goal of proficiency in the state’s learning standards in mathematics. To achieve this measure, all tested students must have a Performance Level Index (PLI) value that equals or exceeds the 2013-14 mathematics AMO of 86. The PLI is calculated by adding the sum of the percent of all tested students at Levels 2 through 4 with the sum of the percent of all tested students at Levels 3 and 4. Thus, the highest possible PLI is 200.¹⁰

Results

SA Harlem 5 scored a PLI of 194 for Mathematics in 2013-14, which is substantially greater than the target AMO of 86.

Mathematics 2013-14 Performance Level Index (PLI)

Number in Cohort	Percent of Students at Each Performance Level			
	Level 1	Level 2	Level 3	Level 4
175	1	6	26	68

$$\begin{array}{rclclclclcl}
 \text{PI} & = & 6 & + & 26 & + & 68 & = & 100 \\
 & & & & 26 & + & 68 & = & \underline{94} \\
 & & & & & & \text{PLI} & = & 194
 \end{array}$$

Evaluation

SA Harlem 5 met this goal by achieving a PL of 194, substantially exceeding the target AMO of 86.

Goal 2: Comparative Measure

Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state mathematics exam will be greater than that of all students in the same tested grades in the local school district.

¹⁰ In contrast to NYSED’s Performance Index, the PLI does not account for year-to-year growth toward proficiency.

Method

A school compares tested students enrolled in at least their second year to all tested students in the surrounding public school district. Comparisons are between the results for each grade in which the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.¹¹

Results

SA Harlem 5 achieved an overall proficiency rate of 93.71 (for students enrolled in at least their second year)%, which was substantially greater than District 5’s proficiency rate of 17.5%.

6						
7						
8						
All	80.0	80	87.5	25.2	62.3	3.55

School's Overall Comparative Performance:
Higher than expected to a large degree

Evaluation

SA Harlem 5 met this goal with an effect size of 3.55. This is significantly higher than the target value of 0.3.

Additional Evidence

The 2012-13 academic year was the first for which SA Harlem 5 has comparative performance data. The school believes that it will demonstrate consistently high effect sizes in the years to come.

Mathematics Comparative Performance by School Year

School Year	Grades	Percent Eligible for Free Lunch	Number Tested	Actual	Predicted	Effect Size
2010-11						
2011-12						
2012-13	3	80	80	87.5	25.2	3.55

Goal 2: Growth Measure¹³

Each year, under the state's Growth Model, the school's mean unadjusted growth percentile in mathematics for all tested students in grades 4-8 will be above the state's unadjusted median growth percentile.

Method

This measure examines the change in performance of the same group of students from one year to the next and the progress they are making in comparison to other students with the same score in the previous year. The analysis only includes students who took the state exam in 2012-13 and also have a state exam score in 2011-12 including students who were retained in the same grade. Students with the same 2011-12 scores are ranked by their 2012-13 scores and assigned a

¹³ See Guidelines for [Creating a SUNY Accountability Plan](#) for an explanation.

percentile based on their relative growth in performance (mean growth percentile). Students' growth percentiles are aggregated school-wide to yield a school's mean growth percentile. In order for a school to perform above the statewide median, it must have a mean growth percentile greater than 50.

Given the timing of the state's release of Growth Model data, the 2013-14 analysis is not yet available. This report contains 2012-13 results, the most recent Growth Model data available.¹⁴

Results

SA Harlem 5 did not serve testing grades in 2011-12. As such, no 2012-13 Mean Growth percentile is available.

Summary of the Mathematics Goal

Type	Measure	Outcome
Absolute	Each year, 75 percent of all tested students who are enrolled in at least their second year will perform at proficiency on the New York State mathematics exam for grades 3-8. This measure assumes that the general format and structure of the State math exam will remain consistent. To the extent that there are significant format and structure changes to the exam, the school understands that its authorizer will take such changes into account when assessing the school's performance.	Achieved
Absolute	Each year, the school's aggregate Performance Level Index (PLI) on the state mathematics exam will meet that year's Annual Measurable Objective (AMO) set forth in the state's NCLB accountability system.	Achieved
Comparative	Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state mathematics exam will be greater than that of students in the same tested grades in the local school district.	Achieved
Comparative	Each year, the school will exceed its predicted level of performance on the state mathematics exam by an Effect Size of 0.3 or above (performing higher than expected to a small degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State. (Using 2012-13 school district results.)	Achieved
Growth	Each year, under the state's Growth Model the school's mean unadjusted growth percentile in mathematics for all tested students in grades 4-8 will be above the state's unadjusted median growth percentile.	N/A

Action Plan

Despite impressive state math test results, SA Harlem 5 is looking to make the following improvements to the math program:

¹⁴ Schools can acquire this data from the NYSED's business portal: portal.nysed.gov.

- More effectively guide students to move away from invented strategies for solving problems, which can sometimes be laborious, towards more efficient strategies that improve accuracy
- Improve the pacing calendar for math instruction so that teachers have time to teach oft-overlooked skills like fractions

SCIENCE

Goal 3: Science

Students will understand and apply scientific principles at a proficient level.

Background

The school's curriculum is unique in its attention to science, including unprecedented daily instruction. The school uses a discovery-based, experiential approach to science, guided by the most influential authorities on elementary science education today, the American Association for the Advancement of Science Benchmarks and the National Resource Council National Science Education Standards. Taught by specialized science teachers, students have hands-on experience with objects, materials, and organisms to understand the natural world. The curriculum provides students with a solid foundation in discovery-based science to ensure that they can excel in middle and high school science classes.

Goal 3: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at proficiency on the New York State science examination.

This measure assumes that the general format and structure of the State science exam will remain consistent. To the extent that there are significant format and structure changes to the exam, the school understands that its authorizer will take such changes into account when assessing the school's performance.

Method

The school administered the New York State Testing Program science assessment to students in 4th grade in spring 2014. The school converted each student's raw score to a performance level and a grade-specific scaled score. The criterion for success on this measure requires students enrolled in at least their second year (defined as enrolled by BEDS day of the previous school year) to score at proficiency.

Results

SA Harlem 5 achieved an overall proficiency rate of 100%.

SA Harlem 5 Performance on 2013-14 State Science Exam

By All Students and Students Enrolled in At Least Their Second Year

Grade	Percent of Students at Proficiency			
	SA Harlem 5 Students In At Least 2 nd Year		All District Students	
	Percent	Number Tested	Percent	Number Tested
4	100%	78	--	--
8				

Evaluation

SA Harlem 5 met this goal by achieving a proficiency rate above 75%. Overall, the school demonstrated extremely high performance.

Additional Evidence

One hundred percent of SA Harlem 5 students passed the New York State science test in 2013-14.

Science Performance by Grade Level and School Year

Grade	Percent of Students Enrolled in At Least Their Second Year at Proficiency					
	2011-12		2012-13		2013-14	
	Percent	Number Tested	Percent	Number Tested	Percent	Number Tested
4					100%	78
8						
All					100%	78

Goal 3: Comparative Measure

Each year, the percent of all tested students enrolled in at least their second year and performing at proficiency on the state science exam will be greater than that of all students in the same tested grades in the local school district.

Method

The school compares tested students enrolled in at least their second year to all tested students in the surrounding public school district. Comparisons are between the results for each grade in which the school had tested students in at least their second year and the results for the respective grades in the local school district.

Results

SA Harlem 5 demonstrated an overall proficiency rate of 100%. Proficiency rates for District 5's 2013-14 New York State Testing Program Science Exam will not be available until spring 2015.

	least their second year and performing at proficiency on the state exam will be greater than that of all students in the same tested grades in the local school district.	
--	---	--

Action Plan

SA Harlem 5 will continue offering discovery-based science to all students five days a week. Results from state science tests show that SA Harlem 5’s focus on science is paying considerable dividends.

NCLB

Goal 4: NCLB
The school will make Adequate Yearly Progress.

Goal 4: Absolute Measure
Under the state’s NCLB accountability system, the school’s Accountability Status is in good standing: the state has not identified the school as a Focus School nor determined that it has met the criteria to be identified as a local-assistance-plan school.

Method

Since *all* students are expected to meet the state's learning standards, the federal No Child Left Behind legislation stipulates that various sub-populations and demographic categories of students among all tested students must meet state proficiency standards. New York, like all states, established a system for making these determinations for its public schools. Each year the state issues School Report Cards. The report cards indicate each school’s status under the state’s No Child Left Behind (NCLB) accountability system.

Results

SA Harlem 5 achieved a status of “Good Standing” in 2013-14.

Evaluation

SA Harlem 5 achieved its goal of attaining a status of “Good Standing” according to NCLB.

Additional Evidence

In 2012-13 and 2013-14, SA Harlem 5 has maintained its “Good Standing.” The school expects to maintain this status in the years to come.

NCLB Status by Year

Year	Status
2011-12	N/A
2012-13	Good Standing
2013-14	Good Standing
